

**Use SI** Words by Marian McKenzie 12-14 Tune: Let it Snow, by Jule Stein (1945)

          D          A7   D                  A7      E      A  
Oh, when problem sets I am grading, and mistakes are just cascading,  
      Em      B      Em      A                  D  
Again and again I cry: "Use SI! Use SI! Use SI!"

          D          A7   D                  A7      E      A  
When the units are wrong or missing, you will often hear me hissing,  
      Em      B      Em      A                  D  
"I cannot imagine WHY - Use SI! Use SI! Use SI!"

[*Bridge:*]

          A                                  E                          A  
Any answer in ergs or dynes fills my heart with sensations of dread.  
          A                                  B                          E          A   A7  
What's the problem with jolly Joules? Why not use Newtons instead?

          D                  A7      D  
Well, my eyes have been slowly crossing,  
          A7      E          A  
So in dreams I'll soon be tossing  
          Em      B      Em          A                  D  
But with every snore I'll sigh, "Use SI! Use SI! Use SI!"
